Attachment(s)  1) Notice of References Cited (PTO-892)  2) Notice of Draftsperson's Patent Drawing Review (PTO-948)  3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  Paper No(s)/Mail Date 3-5.	4) Interview Summary Paper No(s)/Mail Da 5) Notice of Informal P 6) Other:	(PTO-413) ate latent Application (PTO-152)			

Application/Control Number: 09/851,391

Art Unit: 2132

#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 8-10, 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claims 8-10, 15-17 recite a descrambling system for descrambling the input signal before the application of the scrambling system, which makes the claims indefinite because there is no explanation of when the input signal was previously scrambled.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-7, 11-14, 18-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Hashimoto, EP 938,091. Referring to claims 1, 4-7, 11-14, 18-20, 22, 23, 25, 26, 28, 29, Hashimoto discloses an information recording system wherein data is recorded and encrypted, with copy control information, in different modes to allow for varied copy protection. When the data is received the copy control information and encryption mode indicator are read from the data header to determine the copy protection that will implemented during storage. The copy control information indicates "free", "once", or "prohibited" in conformity with the copy

Application/Control Number: 09/851,391

Art Unit: 2132

restriction state of the corresponding data (Col. 8, lines 14-53), which meets the limitation of a discriminating step of discriminating the type of the scramble system of the inputted information signal and the type of the copy control information of the inputted information signal. The encryption mode indicator (EMI) indicates the encryption mode of the data. More specifically the EMI indicates mode A for copy-prohibited data, mode B for copy once data, or free for nonencrypted copy free contents data (Col. 8, line 54 – Col. 9, line 1), which meets the limitations of a scramble system applying step of applying a predetermined scramble system to the inputted information signal and producing a scrambled output when a combination of the discriminated type of the scramble system and the discriminated type of the copy control information coincides with that included in a selected condition, and wherein the selected condition including combinations of a plurality of types of scramble systems applicable to the information signal and a plurality of types of the copy control information to eliminate copying of the information signal via an unauthorized path.

Page 3

Referring to claims 2, 21, 24, 27, 30, the plurality of encryption modes of Hashimoto (Col. 8, line 54 – Col. 9, line 1) would meet the limitations of a plurality of the scramble systems include scramble processings each having different algorithms and corresponding descramble processings and the different scramble systems based on the copy control information.

Referring to claim 3, the copy control information of Hashimoto (Col. 8, line 26-53) would meet the limitation of scramble processings each having different keys and corresponding descramble processings.

#### Conclusion

Application/Control Number: 09/851,391

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin E Lanier whose telephone number is 703-305-7684 until 10/21 and 571-272-3805 afterwards. The examiner can normally be reached on M-Th0 7:30am-5:00pm, F 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703)305-1830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
